MEDICAL TREATMENT OF MINOR STUDENTS

University of Louisiana at Lafayette (UL Lafayette) Student Health Services (SHS) provides medical care for students during their enrollment at UL Lafayette. SHS offers preventive health care, treatment for illness or injury, and health education, all on an outpatient basis. Occasionally, SHS's healthcare staff refers students for specialty services with other physicians within the community, also on an outpatient basis.

When a student under 18 years of age seeks treatment at SHS, we generally seek parental consent prior to providing that treatment. It is sometimes difficult to reach the student's parent/guardian to obtain consent to treatment, which can be frustrating for the student waiting for care. For this reason, SHS recommends that the following authorization be signed by a parent/guardian of students who will begin their studies at UL Lafayette before they turn 18.

AUTHORIZATION FOR TREATMENT

1. I authorize medical treatment for the student named above from UL Lafayette Student Health Services.
2. I understand that this authorization will be in effect until the student reaches age 18.

Printed Name of Parent/Guardian

Relationship

Signature of Parent/Guardian
